Purpose Note for Power BI Dashboard on SDGs 3, 4, 6, 8, and 13

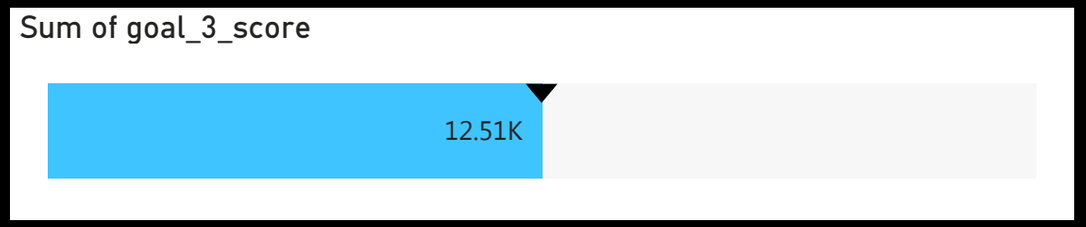

I created a Power BI dashboard to visualize and analyze key indicators for five Sustainable Development Goals (SDGs) representing the three pillars of sustainability:

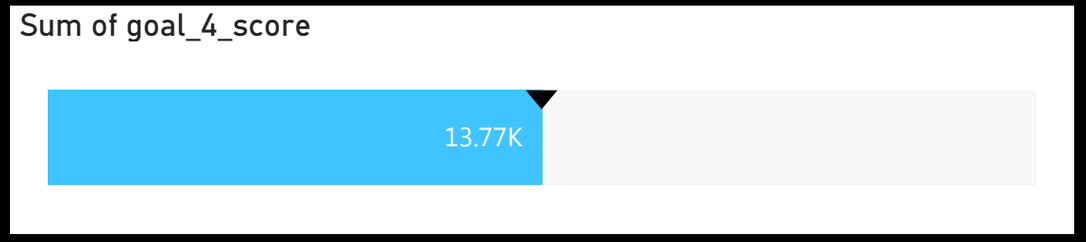

- Social: Health (SDG 3) and education (SDG 4) are essential for societal well-being.
- Environmental: Clean water (SDG 6) and climate action (SDG 13) are crucial for environmental sustainability.
- Economic: Sustainable economic growth (SDG 8) supports job creation and reduces poverty.

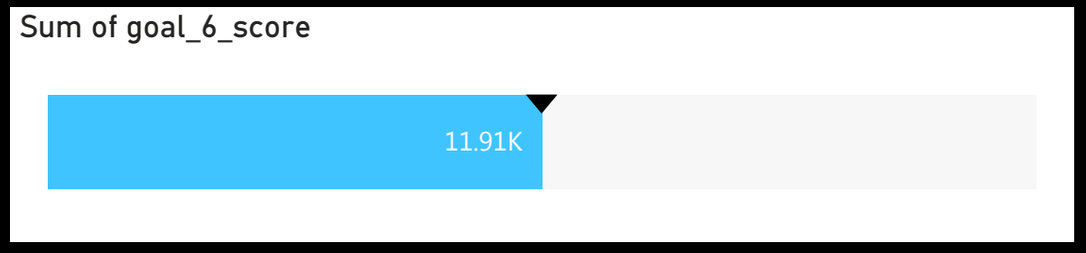

Dashboard Features

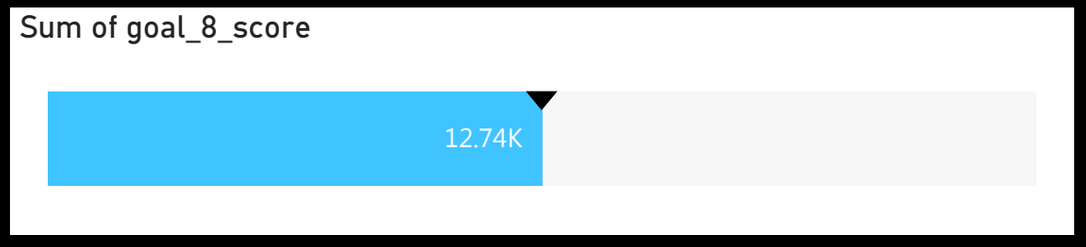

- Trend Analysis: Tracks progress over time for key indicators.
- Comparative Analysis: Compares high and low-performing countries.
- Min, Max, Average Values: Shows distribution and performance across countries.
- Interactive Visuals: Enables data filtering and detailed views.

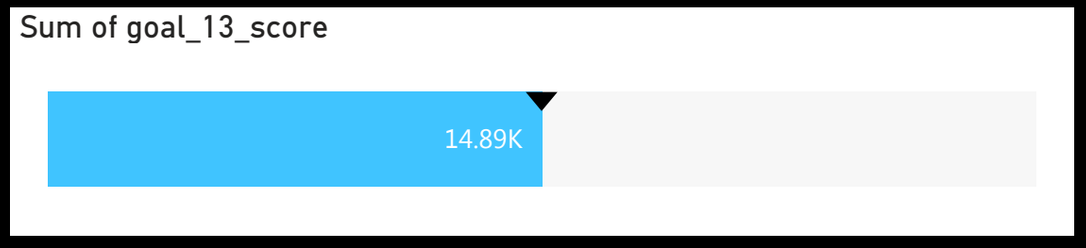

This dashboard provides a view of development, highlighting the interconnections between social well-being, economic growth, and environmental sustainability, supporting informed decision-making for sustainable development.
